Target: Produce Top-class Products
做一流產品

合肥中南光电有限公司
CHINALAND SOLAR ENERGY CO., LTD

Build Reputable Brand
樹百年品牌

Operating Concept: Be concise and pursue excellence.
经营理念：精益求精，追求卓越。

Managing Guideline: Honesty, cooperation, innovation and passion.
管理方针：诚信、合作、创新、激情。

Pursuing the quality

品质追求

Company profile

公司简介

Chinaland Solar Energy Co., Ltd is a hi-tech company engaged in development, research, production, sales and service of crystalline silicon wafers, solar cells, solar panels, and photovoltaic systems.

The newly-built Photovoltaic Industrial Park is a several-hundred-million RMB project invested by Chinaland Solar Energy Co., Ltd., located at Feidong New City Economic Development Zone of Hefei City with convenient traffic. For the first phase, the building area is 60000M². After its completion, the annual output will be over 80 million pieces of silicon wafers, 200MW cells, and 200MW panels.

Chinaland Solar Energy Co., Ltd. is dedicative and professional in the line. It has 5 divisions: Solar Energy Photovoltaic Research Institute, Crystalline Silicon Wafers Division, Solar Cells Division, Solar Power Panels Division, and Photovoltaic Power Generation Systems Engineering Division. Each division has a team of professional engineers and management people. Through high investment in technical research and development, we guarantee superior performance and reliable quality products, and gradually reduce the cost on solar photovoltaic power generation, and realize our target let Chinaland Solar Energy power generation products widely used in families all over the world.

Chinaland Solar Energy Photovoltaic Research Institute

Chinaland Solar Energy Co., Ltd. enhances its science and technology, cooperates with domestic and international research institute, based on the basic research and application development of photovoltaic technologies, to provide strong talent reservation and technical support for the target of good and fast development of photovoltaic industry of our country. The research institute has established three research centers: Research Center on Solar Cells, Research Center on PV Components and Research Center on PV System Integration & Application Technology; meanwhile a Management Center was set up to carry out scientific and technical management and service.

Chinaland Solar Energy Photovoltaic Research Institute aims at building a system platform for technology, market, management, talents and information, effectively cooperating with domestic and international organizations in this field, to make Anhui Province bigger and powerful in photovoltaic industry in the future.

中南光电有限公司是一家专业从事晶体硅硅片、太阳能电池片、太阳能组件、光伏发电系统的研发、生产、销售、服务的高科技企业。

中南光电投资数亿元人民币新建的光伏产业园，坐落于合肥市肥东新城经济开发区，交通便捷。一期建筑面积达60000M²，一期年竣工后达到年产8000万片硅片、200MW电池片、200MW的组件的产能。

中南光电有限公司实力雄厚，公司下设太阳能光伏研究院、晶体硅硅片事业部、太阳能电池片事业部、太阳能组件事业部、光伏发电系统工程事业部。各事业部拥有多名具有高中级专业技术职称的科研、工程技术人员及高素质的管理人员。中南公司通过加大研发投入，确保公司产品性能优越，质量可靠，逐步降低太阳能光伏发电的每瓦发电成本，实现我们的产业梦想：让中南太阳能光伏发电走进千家万户，遍及全球各地。

Certificate

企业证书

Why choose Chinaland?

为何选择中南光电

- 1 As a member of the world photovoltaic family, through our fine quality product, masterly technology, and perfect service, we can supply advanced, green, clean solar PV module to the people all over the world continuously, and make more profit for your investment in solar application.

— 中南光电作为世界光伏产业大家庭中的一员，能以优质的产品，精湛的技术，完善的服务，为全球客户持续供应先进 绿色 清洁的太阳能电池组件，增加您在太阳能应用方面的投资回报。

- 2 Chinaland has production framework of diversification.
 - (1) The power of solar panels can range from 1w to 310w.
 - (2) The type of solar panels: mono-crystalline 125, mono-crystalline 156, poly-crystalline 156.
 - (3) The number of solar cells in the panel: 36 54 60 72 96.
 - (4) The color of the panel: light blue, dark blue, and black.
 - (5) The kind of panels: TPT (TPE) panels, aluminum back panels, double glazing panels.
- 二 中南光电有着多元化的产品结构：
 - 1 组件的功率能从1W至310W
 - 2 组件的类型：单晶125 单晶156 多晶156
 - 3 组件的串数(片数) : 36 54 60 72 96
 - 4 组件的颜色：浅蓝 深蓝 黑色
 - 5 组件的种类：TPT(TPE)组件 铝背板组件 BIPV组件
- 3 Chinaland uses advanced manufacturing craft, decreasing the resistance of the panels, enhancing the fill-factors after the series welding, consequently, gets good Low-light performance.
 - 三 中南光电采用先进的生产工艺，能使电池组件内部串联电阻降低，使得串焊后的填充因子提高，从而获得卓越的弱光性能。
- 4 Chinaland tries its best to research the matching of electrical properties of panels, greatly bringing down the reverse leakage current, prolonging the life of the panels, making unique anti-declining property.
 - 四 中南光电着力研究电池片电性能的匹配性，最大限度降低反向漏电流，在光照下性能衰退少，延长组件寿命。

Why choose chinaland?

- 6 Completed solar industrial system in Chinaland. Chinaland Solar Energy Co., Ltd is a company engaging in R&D, producing the industrial chains of crystalline ingot—crystalline wafer—crystalline cell—crystalline panels, meanwhile, it is trying best to cultivate best centre of R&D and Experiment Center and production control center, all of these can make Chinaland have continuous Competitiveness in technology, craftsmanship, and quality, and offer important insurance to the development of our business partner.

六 完整的产业链，中南光电致力于从硅棒—硅锭—切片—电池片—电池组件—封装—系统应用整个产业链的研发 生产，并着力打造顶级的研发中心 实验中心 产品控制中心，让中南光电的产品在技术 工艺 品质拥有持续竞争力，也为我们商业合作伙伴的发展提供重要保障。

■ 5 Chinaland launches a new product ceremoniously, chinaland NO.1 solar PV module, enhancing the convert efficiency. It makes the dramatic decrease of the cost in both human and material resources. According to the authority, if the convert efficient enhances 1%, it will cut 5% investment cost. If you become one of the Chinaland partners, you will get more and more return on investment.

五 中南光电隆重推出产品—中南1号光伏组件，产品的转化率得到提升，无论在人工成本上或土地成本上都能获得显著地降低，经测算太阳能产品每提高1%的转化效率将能降低5%的投资成本，如您愿成为中南合作伙伴中的一员，可以获得更高的投资回报。

- 7 Along with the extending in business, our sale network service has reached to all over the world. We have set up more than ten Overseas proxy service providers. We are now trying best to make the preparation for the center of European sale, service, and storage. I hope we can come into being "One base, Two centers" in 2011, that means, make China the R&D, producing, sale, service base, make Euro and North America two centers of sales service and storage, thereby, we can supply more complete, thoughtful, fast service to our business partners in the world.
七 中南光电在业务上不断拓展，我们的营销服务网络辐射全球各地，我们建立数十家海外代理服务商，公司现正在筹备欧洲地区营销 服务仓储中心，在期于2011年形成以一基地二中心，即以中国为研发 生产 销售 服务基地，以欧洲地区 北美地区为销售 服务 仓储的二个中心，从而为我们全球的合租伙伴提供更加完善 周到 快捷的服务。
- 8 We make continuous efforts to supply better products and service to our customers, try our best to know the requirements of the customers from several channels, and polish our customer service continuously, work out the customers' problems fast and in time. We want to strengthen the communication between us and partners, and active listen to the precious advice from the partners.
八 中南光电一直在努力，为我们的客户提供优质的产品及服务，努力多渠道了解客户的需求，不断完善我们的服务工作，快速及时的为客户提供解决方案，我们诚心地与合作伙伴加强交流，倾听合作伙伴给我们提出的宝贵意见。

Chinaland Solar Energy Photovoltaic Research Institute

中南光伏研究院

With the investment of RMB6,000,000.00, Chinaland solar energy plans to enhance its science and technology, cooperating with domestic and international research institute, based on the basic research and application development of photovoltaic technologies, to provide strong talent reservation and technical support for the target of good and fast development of photovoltaic industry of China. The research institute has established three research centers: Research Center on Solar Cells, Research Center on PV Components and Research Center on PV System Integration & Application Technology; meanwhile a Management Center was set up to carry out scientific and technical management and service.

Chinaland Solar Energy Photovoltaic Research Institute aims at building a system platform for technology, market, management, talents and information, effectively cooperation with domestic and international organizations in this field, makes Anhui Province big and powerful in photovoltaic industry in the future.

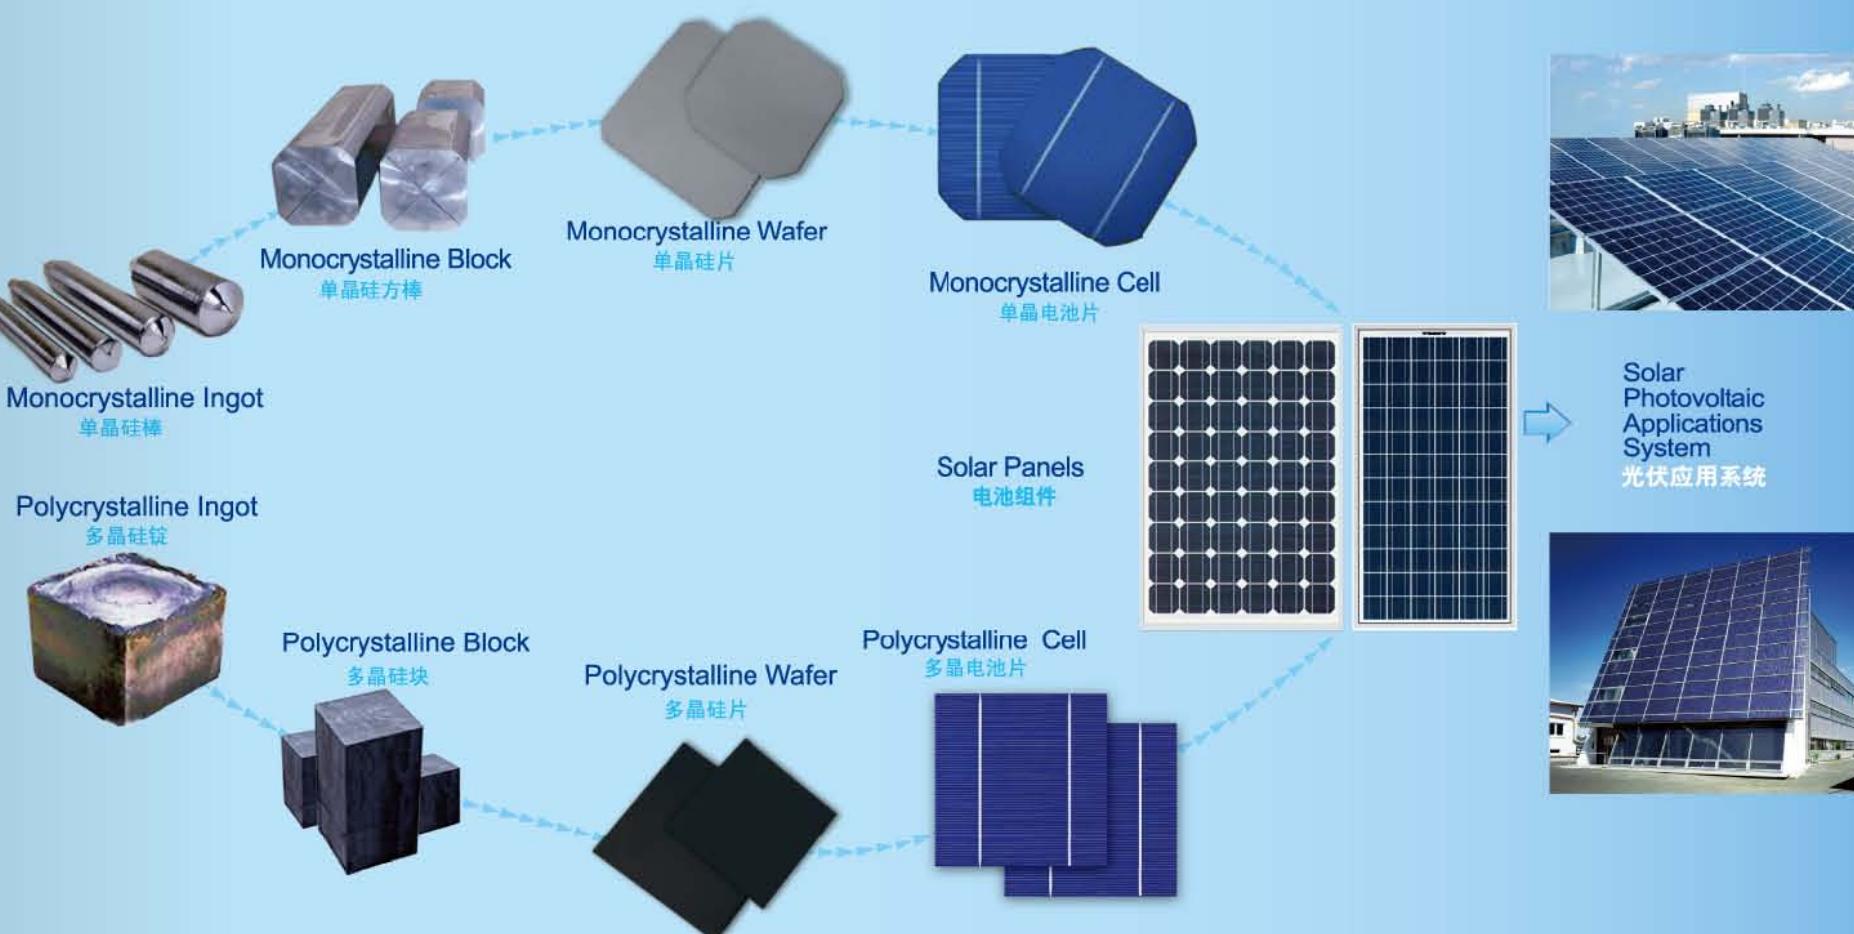

合肥中南光电有限公司拟投资600万元，以提高科技创新能力为主线，联合国内外科研机构，立足光伏领域前沿技术的基础研究和应用开发，为实现全国光伏产业“又好又快”的发展目标，提供强有力的人才储备和技术保障。研究院建有3个研究中心：太阳电池研究中心、光伏组件研究中心、光伏系统集成及应用技术研究中心；同时建立一个管理中心，以开展科技管理和科技服务工作。

中南光伏技术研究院旨在构建技术、市场、管理、人才与信息的系统平台，有效对接世界及国内兄弟省、市的行业组织，共同打造安徽光伏大省、光伏强省的产业未来。

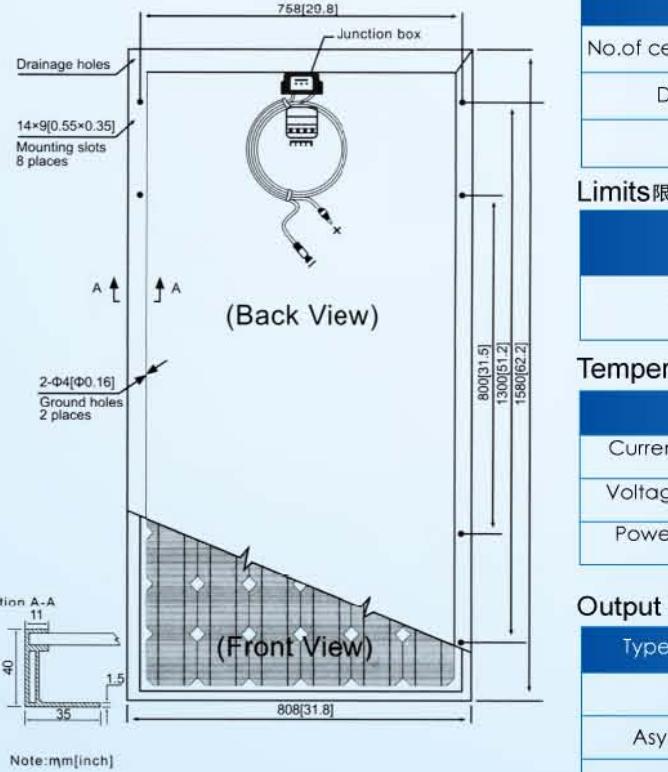

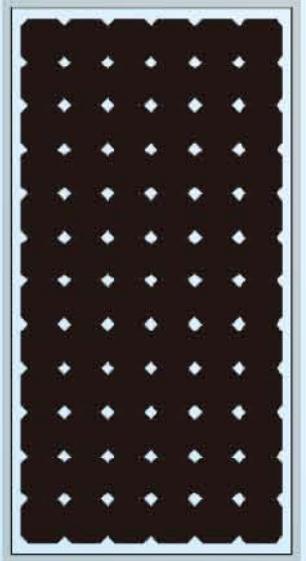

Complete solar industrial system in chinaland

中南完整光伏产业系统

New Release 新品发布

Chinaland NO.1 which is the global leader in the industry
 领先全球行业的中南1号(125 72pcs) 200W问世
 mono solar panels 125(72pcs) 200W

Characteristics 特征

Model 型号	Maximum power at STC(Pm) 最大功率	Open circuit voltage(Voc) 开路电压	Optimum operating voltage(Vmp) 最佳工作电压	Optimum operating current(Imp) 最佳工作电流	Short circuit Current(Isc) 短路电流
CHN200W-72M	200W	45V	37V	5.41A	5.8A

Specifications 规格

Cell 电池片	Monocrystalline silicon solar cells 单晶太阳能电池片 125mm*125mm
No.of cells and connections 电池片数量及串接	72(6×12)
Dimension of module(mm) 尺寸	1580×808×40
Weight 重量	16kg

Limits 限度

Operating temperature 工作温度	-40 to +85°C
Maximum system voltage 最大系统电压	1000 V DC

Temperature and Coefficients 温度及系数

NOCT:Nominal Operation Cell Temperature	
NOCT额定运行电池温度	45°C ± 2°C
Current temperature coefficient 电流温度系数	%/k 0.06 ± 0.01
Voltage temperature coefficient 电压温度系数	mV/k -(155 ± 10)
Power temperature coefficient 功率温度系数	%/k -(0.5 ± 0.05)

Output 输出

Type of output terminal 输出端类型	Junction box 接线盒
Cable 电缆	LAPP(4.0mm ²)
Asymmetrical lengths 非对称长度	900mm(-) and 800mm(+)
Connection 连接	Type IV

领先全球行业的中南1号(125 72pcs)

Solar panel of CHINALAND NO. 1 中南1号

1. According to the increasing depletion of traditional energy sources, the green clean and inexhaustible solar energy gradually walks into the people's lives. In order to develop the solar panels with more efficiency, lower cost, better quality and faster return, CHINALAND NO.1 solar panels open a "win-win cooperation economy" good chapter in the life!

1. 传统能源日益枯竭的今天，取之不竭、绿色洁净的太阳能逐渐走进百姓的生活，我们从未停止过追逐太阳的步伐，效率更高，成本更低，品质更好，回报高效太阳能电池板中南1号，开启了“多赢合作节约”的美好生活篇章！

2. In the same size of solar panels, the output power of CHINALAND NO.1 increased by 10% comparing with the normal standard solar panel. CHINALAND NO.1 can store more energy, maximize solar resource.

2. 在组件面积相同的条件下，中南1号电池组件输出功率比原先普通电池组件提高了10%，中南1号能使组件存储更多的能量，最大限度地获取太阳资源。

3. In the same installed power generation systems, the use of CHINALAND NO.1 can save 10% quantity of solar panels, thereby saving installation time.

3. 在安装相同的发电系统中，使用中南1号，能节省10%的组件数量，从而节省安装的时间。

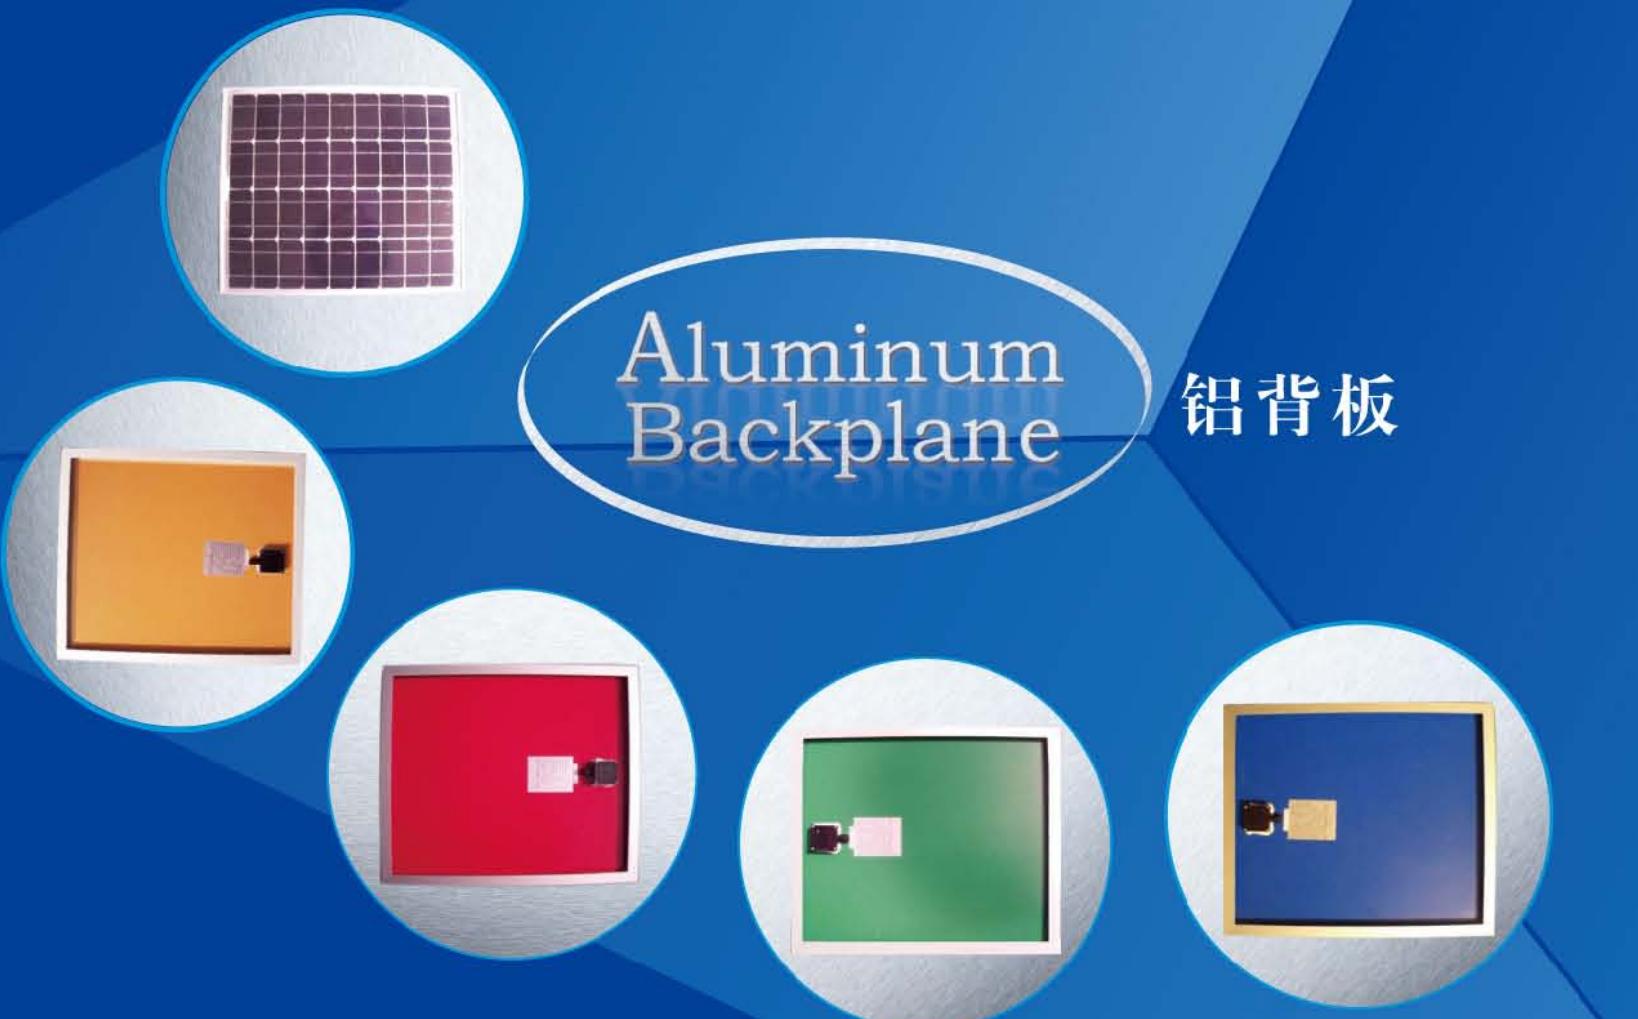

4. In the same power generation system, the use of CHINALAND NO.1, not only saves the quantity of solar panels, but also reduces the space or ground area required to install, as a result it reduces the use of space and land-use costs.

4. 在相同发电系统中，使用中南1号使得组件数量的节省，也减少了要安装组件所需的空间或地面面积，从而达到降低使用空间或者土地的使用成本。

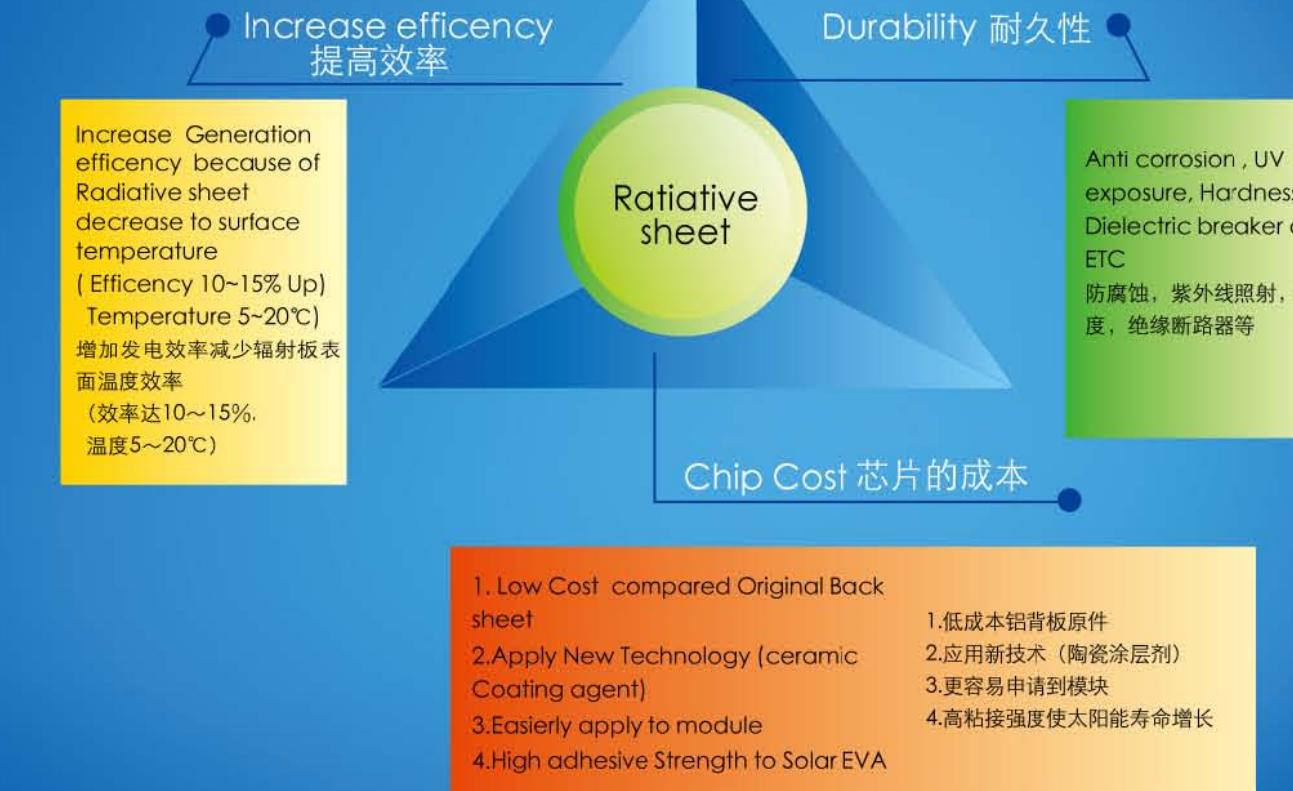

5. In the same power generation system, in the later maintenance of CHINALAND NO.1, logistics cost, installation cost, or labor cost of maintenance and cleaning can be reduced greatly.

5. 在相同发电系统中，中南1号组件在后期的维护中，无论在物流成本或者是后期安装施工，产品的维护、清洁等方面的人工成本都能得到大大的降低。

Solar System

Photovoltaic Power Generation System is a system that converts solar power into electrical energy by making use of the photovoltaic effect.

The main components of Photovoltaic Power Generation System are solar cells, batteries, controllers and inverters.

Photovoltaic Power Generation System is divided into independent solar photovoltaic system and grid-connected solar photovoltaic system.

Independent solar photovoltaic power generation means that the solar photovoltaic power generation is not connected with the grid, and its typical characteristic is it requires batteries to store the energy for electricity at night. Independent solar photovoltaic power generation is mainly used in remote villages inside civil scope, such as home systems and village-level solar photovoltaic power stations; while in the industrial scope it is mainly for telecommunication, satellite radio & television, and solar water pump. It can also be composed into a mixed power generation system in areas with wind power and small-sized hydroelectric power, such as the complementary system with wind power / solar power generation.

Solar power generation system is made up of solar panels, solar controllers, and batteries (groups). If its output power is 220V or 110V alternating current, it also needs to be equipped with an inverter. The functions of each part are as follow:

(1) Solar Panel: Solar Panels are the core of the solar power generation system as well as the part with the highest value. Its role is to convert the sun's radiation into electrical energy or send the radiation to batteries for storage or promote the load performance. The quality and cost of Solar Panels will directly determine the quality and cost of the entire system.

(2) Solar Controller: The role of Solar Controller is to control the working status of the whole system, and protect batteries from being over-charged or over-discharged. In a place with large temperature difference, qualified controller should also have the function of temperature compensation.

(3) Battery: It is always lead-acid battery. In a small system, it can also be a nickel-hydrogen battery, nickel-cadmium battery or lithium battery. Its role is to store the electrical energy produced by Solar Panel at sunshine time and release it when needed.

(4) Inverter: In many occasions, it is required to provide the alternating power supply of 220VAC and 110VAC, because the direct outputs of solar power are generally 12VDC, 24VDC, 48VDC.

系统工程

光伏发电系统是将太阳能转换成电能的发电系统，利用的是光生伏打效应。

光伏发电系统的主要部件是太阳能电池、蓄电池、控制器和逆变器。

光伏发电系统分为独立太阳能光伏发电系统和并网太阳能光伏发电系统。

独立太阳能不需与电网连接，典型特征为需要蓄电池来存储夜晚用电的能量。主要用于边远的乡村民用范围，如家庭系统、太阳能光伏电站；在工业范围内主要用于电讯、卫星广播电视、乡村水平的太阳能水泵，在具备风力发电和小水电的地区还可以组成混合发电系统，如风力发电/太阳能发电互补系统等。

太阳能发电系统由太阳能电池组、太阳能控制器、蓄电池（组）组成。如输出电源为交流220V或110V，还需要配置逆变器。各部分的作用为：

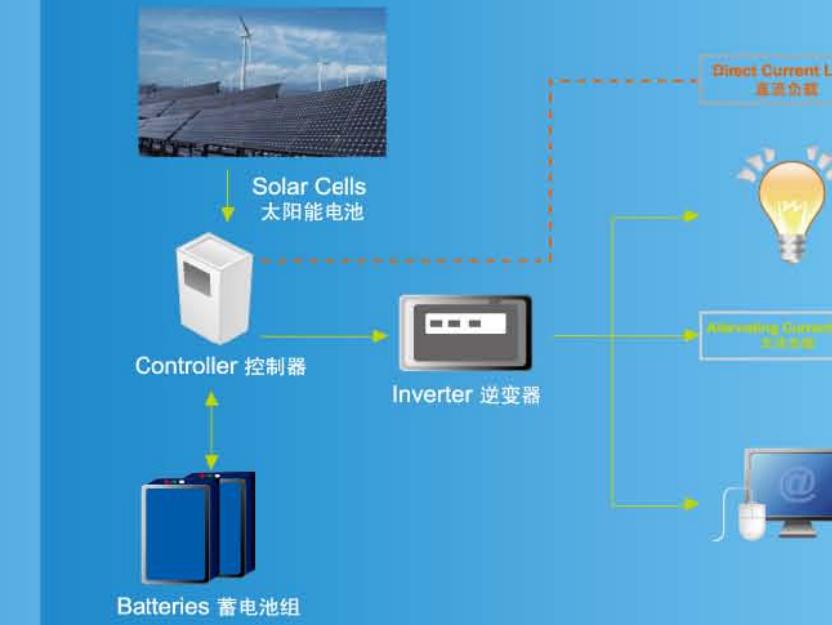

（一）太阳能电池板：太阳能电池板是太阳能发电系统中的核心部分，也是太阳能发电系统中价值最高的部分。其作用是将太阳的辐射能力转换为电能，或送往蓄电池中存储起来，或推动负载工作。太阳能电池板的质量和成本将直接决定整个系统的质量和成本。

（二）太阳能控制器：太阳能控制器的作用是控制整个系统的工作状态，并对蓄电池起到过充电保护、过放电保护的作用。在温差较大的地方，合格的控制器还应具备温度补偿的功能。

（三）蓄电池：一般为铅酸电池，小微型系统中，也可用镍氢电池、镍镉电池或锂电池。其作用是在有光照时将太阳能电池板所发出的电能储存起来，到需要的时候再释放出来。

（四）逆变器：在很多场合，都需要提供220VAC、110VAC的交流电源。由于太阳能的直接输出一般都是12VDC、24VDC、48VDC。
